EDUCATION

MCA (2023 – 2025)

CGPA: 9.83

SRM Institute of Science and Technology

B.SC BIOTECHNOLOGY(2020 – 2023)

CGPA: 8.55

Bon Secours College for Women, Thanjavur

HSC (2019-2020)

Percentage: 67%

Maxwell Matriculation Hr. Sec. School,
Thanjavur

SSLC (2017-2018)

Percentage: 84%

Maxwell Matriculation Hr. Sec. School,
Thanjavur

SKILLS

Programming

- Python, C, PHP, SQL

Web Development

- HTML, CSS, JavaScript

Machine Learning

- NumPy, Pandas, Scikit-learn
- Regression & Classification Models

Generative AI

- Ollama, LLaMA, Mistral, Gemini API
- LangChain, Prompt Engineering, LLM-as-Judge Evaluation (deepeval)

Tools & Platforms

- Unity 3D, XR Toolkit
- Jupyter Notebook, VS Code

PROFILE

Motivated and enthusiastic developer with a strong foundation in

Web Development, Python, and Artificial Intelligence concepts.

Experienced in developing interactive applications and exploring Machine Learning and Generative AI technologies.

EXPERIENCE

AI DEVELOPER TRAINEE — IAMNEO-AN NIIT VENTURE

2026 – PRESENT

- Build AI-driven applications using Python, Machine Learning, and Generative AI tools.
- Work on LLM-based development, prompt engineering, and model evaluation.

PROJECTS

AI-BASED LSRW CEFR LEVEL QC CHECK

- Built an LLM-as-judge pipeline (Python, Gemini, deepeval) to auto-score Listening, Speaking, Reading, and Writing test items.
- Used multithreading to flag scoring accuracy and fairness issues for review.

REAL-TIME EXAM INTEGRITY SYSTEM

- Developed an AI agent (Python, FastAPI, WebSockets) to detect anomalous exam behavior in real time.
- Built a live admin dashboard with Scikit-learn and SQLAlchemy to flag and lock suspicious attempts.

STUDENT BEHAVIOR PROFILE BUILDER

- Built a behavioral analytics tool (Python, Pandas, NumPy) that models each student's normal exam behavior.
- Used statistical baselines to auto-flag attempts that deviate from a student's norm.

AI-BASED CSV QUESTION ANSWERING SYSTEM

- Developed an AI system using Python and Ollama to answer questions from CSV datasets.
- Implemented LLM-based text generation and contextual responses.
